

NAJAM RAZZAQ

MERN Stack & Codeigniter 4 Developer

☎ +92 327-8737313 ✉ najamrazzaq7861@gmail.com

🐙 [GitHub](#) [LinkedIn](#)

Professional Summary

Web Developer with hands-on experience building scalable enterprise web applications using the MERN Stack and CodeIgniter 4. Experienced in developing secure REST APIs, role-based management systems, payment gateway integrations, AI-powered features, ERP solutions, and responsive user interfaces. Skilled at designing clean architecture, optimizing application performance, and delivering production-ready software from concept to deployment. Passionate about writing maintainable code and solving complex business problems through modern web technologies.

Technical Skills

Languages : JavaScript (ES6+), HTML5, CSS3, PHP

Frontend : React.js , Bootstrap 5, Tailwind CSS

Backend : Node.js, Express.js, CodeIgniter 4

Databases : MongoDB, MySQL

Authentication : JWT, Role-Based Access Control

Tools : Git, GitHub, Postman, VS Code, Cursor, Antigravity, Copilot, Lovable, Stitch Ai,

Professional Experience

AlgilityX Private Limited Islamabad

Web Developer (Part-Time)

June 2026 – August 2026

Frontend Development : Built responsive React.js interfaces for multiple client platforms.

Admin Dashboard : Developed an administrative dashboard using Node.js and Express.js.

Rapid Prototyping : Used Lovable to accelerate React-based UI development and cut prototyping time.

WebSphere Innovations Private Limited Islamabad

Junior Web Developer

November 2025 – August 2026

Architecture & API Scalability: Spearheaded the development of modular full-stack web applications, engineering scalable RESTful APIs with Node.js/Express.js and optimized MySQL/MongoDB relational schemas.

Advanced Security & Analytics: Designed and deployed multi-role access control (RBAC) systems using secure JWT authentication and Axios interceptors to guarantee seamless, protected data flow across dynamic dashboards.

UI/UX Optimization: Engineered pixel-perfect, highly responsive user-centric interfaces utilizing Tailwind CSS and Bootstrap 5, significantly improving frontend rendering efficiency and system usability.

Web Developer Intern

August 2025 – November 2025

Feature Implementation: Collaborated in building secure inventory management modules and real-time operational data tracking capabilities under rigorous code quality standards.

System Integration: Mastered complex client-side routing structures using React Router, successfully linking dynamic React.js components with backend services.

Live Projects

Project: ABHCC Healthcare Management System

Link : <https://abhcc.org/>

Tech Stack : CodeIgniter 4, MySQL, Bootstrap

- **Payment Integration:** Successfully Integrated Stripe and Flutterwave payment gateways supporting secure international transactions.
- **Feature Innovation:** Engineered and deployed a custom AI chatbot to automate user queries, improving live platform engagement and customer support efficiency.

- **System Optimization:** Overhauled existing legacy features, refactored core CodeIgniter 4 code, and optimized MySQL database queries to enhance system performance.

Project: Surion Financial Group CRM

Link : <https://surionfinancialgroup.com/>

Tech Stack : CodeIgniter 4, MySQL, Bootstrap

- **Platform Development :** Built an enterprise fintech platform from scratch with cross-device responsiveness.
- **UI Styling :** Styled with Tailwind CSS for a fast-loading, professional fintech layout.
- **Video Integration :** Implemented virtual consultations via BigBlueButton open-source video conferencing.
- **Database Design :** Designed the full relational MySQL architecture for financial workflows.

Project: AigilityX Corporate Platform

Link : <https://aigilityx.com/en/>

Tech Stack : React.js, Node.js, Express.js

- **Frontend Development :** Built reusable, responsive React.js components and modern UI layouts.
- **Backend Development :** Developed an admin dashboard using Node.js and Express.js.
- **API Integration :** Connected frontend components with RESTful APIs for reliable data flow.

Project: SARPI Platform

Link : <https://sarpi.aigilityx.com/>

Tech Stack : React.js, Tailwind CSS, Typescript

- **Frontend Development :** Built responsive, interactive interfaces with clean layouts and reusable components.
- **AI-Assisted Development :** Used Lovable to accelerate frontend implementation and prototyping.
- **Feature Enhancement :** Refined existing interfaces and resolved UI issues to improve usability.

Notable Projects

Project: Multi-Branch Clinic Management ERP

Tech Stack : *MERN Stack, Tailwind CSS, Chart.js*

- **Architecture :** Designed multi-branch structure with data isolation and centralized medicine records.
- **Inventory Management :** Built batch-level tracking, expiry monitoring, and FIFO stock deduction.
- **Dashboards :** Built role-based dashboards (Admin, Doctor, Receptionist, Pharmacist) with Chart.js analytics.

Project: LeadAxel B2B Marketplace Platform

Tech Stack : CodeIgniter 4, MySQL, Tailwind CSS

- **Multi-Role Dashboards :** Built role-based dashboards with personalized analytics and permissions.
- **Database Modeling :** Designed indexed MySQL schemas for fast multi-role data delivery.

Education

University of Punjab

Bachelor of Science in Computer Science

Main Subjects: Computer Science, Mathematics, Statistics

2020 – 2022

Lahore
